

Introduction

Dalpitech is a proud Italian company which specialises in manufacturing technology for the protection of health, safety and the environment.

The portable purifiers produced are suitable for the abatement of pollutants generated by welding procedures and for the extraction of dry metallic dusts produced during grinding, frosting, polishing and filing operations within the scope of light and intermittent duty cycles.

The filtration system of each machine consists of a BIA-certified hydro/oil resistant polyester antistatic cartridge which allows very high degrees of separation with a high level of mechanical stability, resistance to humidity and temperature.
